Hey guys,

Wanted to let you know that we have confirmation that Stella Jones and Colfax (Ray Brown) are available on Sept. 17th for the corporate meeting in Dallas. I just sent an email to Danny Vines (Kisatchie) to see if we can confirm that date for him. If I get word from him today, we need to think about which conference room to hold our meeting - and who from EPA will attend - I think our management team should be present. Please ask your folks and see if they would like to attend. We have several issues to discuss with the corporate partners, outlined below:

- do we sign this CSI with EPA and corporates only; with the caveat that if LDEQ joins us in Nov/Dec, then we just add a line and re-print? - do we go ahead and plan a signing ceremony w/o LDEQ or wait?
 - we need to discuss the nuances of the Community Sustainability Network (our community panel) and go over the 'guidelines' we have
 - we want to hear their ideas on community engagement
 - the most important issue is to discuss their commitment to "continue the development of best management practices (BMPs)". AS YOU KNOW - we are adamant about two specific BMPs that we really want to see in place: 1) a BMP on the storage of treated timbers - already SJC moved their treated timbers away from the fenceline, which is an improvement, and as Ed Barth from ORD also pointed out - if the new storage area is under an awning then there is less UV radiation which may lessen the off-gassing - BUT there are still improvements to a more ROBUST BMP that we would like to see; 2) Wilma Subra pointed out that one of the most important issues is that the plants need to communicate to the public - so, we are requesting a communication BMP - I have already sent them an example (practically wrote it out for them) - so, I'm interested in seeing what they propose for that.
- THESE TWO ISSUES are vital to the success of this project, and it is a major accomplishment that they are agreeing in the CSI to BMPs!!! - we would also like to see other BMPs on improvements to other operational practices, which they could glean from a Sustainability Assessment - which is the other topic to discuss with them. SJC eludes to the fact that they are already doing something along those lines - our ORD experts (Ed Barth) are waiting and available to assist with the SA.

Comments/questions/other - all welcome - thanks to everyone!!

Nancy
